A. E. WOHLERT
THE GARDEN
NURSERIES
PENN VALLEY, NARBERTH, PA.

Japanese Roseflowering Cherries

- ASAHI-BOTAN ZAKURA, early or mid-season; blush; double; one of the very slow growing sorts; dwarf habit; prolific bloomer; hyacinth arrangement of flowers.
- AMANOGAWA ZAKURA, light pink; late; fragrant; double; pyramidal or columnar; new variety; just right for formal planting or small gardens. A very unusual sort, attracts favorable attention always—and yet very rare. Planted two feet apart in a straight line, Amanogawa makes a perfect hedge and need never be pruned or sheared.
- BENI HIGAN ZAKURA (*Higan Cherry, P. Subhirtella*), "Spring Cherry." First to bloom; very prolific; blush pink; small single flowers that bloom with the last snow of winter.
- FUJIZAN (*Shirotae; Mount Fuji*), snow white; large double flowers; vigorous; extra choice. A splendid showy variety; considered one of the better of the white double Japanese Cherries.
- HOSOKAWA-BENI ZAKURA, pink, mid-season; upright growth, slight spread; fragrant double flowers; one of the best; another of the hyacinth flowering sorts.
- JEANNE WOHLERT, dwarf; semi-double; new; rare. The effect of this tree in bloom is that of many branched hyacinth of a lovely soft pink.
- KANZAN ZAKURA (*Kwanzan*), double deep pink; vigorous; upright and no great tendency to spread. One of the best. A good street tree. The best deep pink sort. If planted in quantities this sort should have a lighter variety, such as Naden or Rosea, as a foil.
- KOFUGEN ZAKURA (*Fugenzo*), double, deep pink. Very similar to Kanzan Zakura.
- MIKURUMAGAESHI ZAKURA, blush; mid-season; double flowers; spreading growth; one of the loveliest; a typical hyacinth flowering variety; fragrant.
- NADEN ZAKURA, pink; late flowering; double; very popular; vigorous grower; showy and attractive; adapted for street or lane planting. This variety is an excellent companion for Kofugen.
- PAUL WOHLERT, semi-double; deep pink or red; fragrant; flowers in great profusion. The earliest of the large hyacinth flowering varieties.
- ROSEA (*Rose*), late; double flowers about 1¾ inches in diameter, borne in raceme-like clusters of three or four flowers; vigorous; a spreading sort; a good lane, shade or street tree. A free bloomer and the flowers open fully just as the leaves commence to develop.
- SERRULATA ALBO ROSEA (*Shirofugen*), vigorous; light pink; large double flowers. Late flowering.
- SHIRO HIGAN, single pink; large flowers; early; vigorous. A choice sort.
- SHOGETSU, soft pink; double; large. Has leafy green carpels in center of flower; leaves very pale green. A beauty in every way.
- TAIZANFUKUN, flowers of medium size, double and tufted. Light pink, becoming flesh, or nearly white; leaves small; grows unusually erect and slender; late.
- TAKINIOI, flowers of medium size, single and semi-double; buds flesh, open flowers white. Valued for its delightful fragrance.
- YOSHINO DAYBREAK, delicate flesh pink. Single flowers so dense as to almost obscure the branches. Flowers are a deeper color and larger than Yoshino.

Price of above 18 varieties

Height	Priced by Height			Priced by Caliper—Measured 12" above the ground		
	Each	Ten	100	Caliper	Each	Ten
3 to 4 ft.	\$1.50	\$12.50	\$100.00	1½ to 1¾ in.	\$6.00	\$50.00
4 to 5 ft.	2.50	22.50	200.00	1¾ to 2 in.	7.50	70.00

8 to 10 ft.	10.00	75.00	550.00	2½ to 2¾ in.	20.00	190.00
10 to 12 ft.	15.00	125.00	1,000.00	2¾ to 3 in.	25.00	225.00
12 to 14 ft.	20.00	150.00	1,250.00	3 to 3½ in.	35.00	325.00
14 to 16 ft.	25.00	225.00	2,200.00	3½ to 4 in.	50.00	450.00

AUTUMNALIS (October flowering), semi-double; pink flowers; blooms in Fall and early Spring; very unusual and rare. During the mild winter of 1950-51, Autumnalis was in bloom from November until May. On Christmas Day that year it was particularly notable for the very liberal display of flowers.

Price of Autumnalis

Size	Each	Ten	Size	Each	Ten
3 to 4 ft.	\$5.00	\$45.00	5 to 6 ft.	\$6.50	\$60.00
4 to 5 ft.	6.00	50.00	6 to 7 ft.	7.50	70.00
			7 to 8 ft.	10.00	90.00

MRS. A. E. WOHLERT, our latest introduction; much clearer and more brilliant color than Kanzan or Kofugen. A great improvement. As soon as enough stock is available of this sort, we perhaps may discard the other two varieties. Kanzan is rated in Washington as a leader, but this new variety is far superior.

Size	Each	Ten	Size	Each	Ten
2 to 3 ft.	\$3.00	\$25.00	4 to 5 ft.	\$5.00	\$45.00
3 to 4 ft.	4.00	35.00			

CURTIS BOK, same description as Mrs. A. E. Wohlert, but both of these sorts are from entirely different origin and may develop plenty of difference later; at the present time there is very little difference.

Size	Each	Ten	Size	Each	Ten
5 to 6 ft.	\$7.50	\$65.00	6 to 7 ft.	\$9.00	\$80.00

SARGENTI (Yama; Prunus serrulata sachaliensis), single, large flowers of light red violet; early; spring foliage copper beach color, green in summer; a popular sort; very hardy.

Size	Each	Ten	Size	Each	Ten
4 to 5 ft.	\$3.00	\$25.00	6 to 7 ft.	\$5.00	\$40.00
5 to 6 ft.	4.00	30.00	7 to 8 ft.	7.50	60.00
			8 to 10 ft.	10.00	80.00

YOSHINO, single blush; red buds; early. Also called "Yedoensis." This is the tree that borders the Tidal Basin in Washington, D. C. A snow white form exists. Our Weeping Yoshino (Shidareyoshino) is snow white.

Size	Each	Ten	Size	Each	Ten
3 to 4 ft.	\$2.50	\$20.00	7 to 8 ft.	\$5.00	\$45.00
4 to 5 ft.	3.00	25.00	8 to 10 ft.	7.50	60.00

5 trees	5 to 6 ft.	high for	5.00
5 trees	6 to 7 ft.	high for	8.00

Flowering Crabs

- MALUS ARNOLDIANA (*Arnold C.*), semi-double; pink; early flowering; splendid foliage; yellow fruit: a popular sort.
- MALUS ATROSANGUINEA (*Carmine C.*), single; red; bush form; early flowering. This is my personal preference; it may be used in varied positions. Absolutely the most showy of the lot. Adapted for hedge planting or screens. Makes a perfect hedge 8 to 10 feet high.
- MALUS DR. VAN FLEET. A new introduction of merit. Vigorous grower. Large pink single flowers.
- MALUS ELEYI, Plum red foliage and bloom. NEW. Best red leaf sort. In sunlight the foliage is quite brilliant and stays so until fall, rivaling Japanese red-leaf maples. During flowering period the tree is smothered with large purple flowers in clusters. Absolutely the most showy variety while in fruit, which is of apricot color, cherry size. In both Pyramid and Standard forms.
- MALUS FLORIBUNDA, single; pink; early; spreading. Yellow fruit, slightly tinted red. An old, well-known sort and for that reason one of the best sellers. Should be used with all the dark sorts.
- MALUS FLORIBUNDA-PURPUREA, one of the best, copper beach color foliage and flowers of beautiful red violet, dark purple fruit. When the tree is in bloom, it is absolutely covered with deep purple blossoms more densely than any other variety I have observed with the exception of Hopa and Eleyi, which are equally good. Standard or Tree Form.
- MALUS HOPA, large flowering, purple leaf crab. Very hardy and prolific bloomer. Very showy fruit; quite formal and shapely growth. A variety of great merit. Deep rose-colored flowers.
- MALUS RED TIP. New. Pink flowers; strong grower. A variety of great merit.
- MALUS SCHEIDECKERI, double; pink; free flowering; fruit excellent for jelly. One of the most conspicuous pink flowering trees of early spring; very hardy.
- MALUS SPECTABILIS ROSEA PLENA, very large double pink flowers profusely produced. A rare sort; very choice. One of the better double-flowering varieties.
- MALUS SPECTABILIS WHITE, a white form of the above.

Prices of above 11 varieties

Size	Each	Size	Each	Size	Each
4 to 5 ft.	\$1.50	7 to 8 ft.	\$5.00	9 to 10 ft.	\$15.00
5 to 6 ft.	2.00	8 to 9 ft.	7.50	Heavy 9 to 10 ft.	20.00
6 to 7 ft.	3.00	Heavy 8 to 9 ft.	15.00	10 to 12 ft.	55.00

- MALUS MICROMALUS (*Midget C.*), flowers pink tint; single; dwarf habit. An extra choice sort. NEW. Compact growth, vase form. The long, slender branches covered with flowers suggest garlands of flowers. Real quality, a prime sort.
- MALUS THEIFERA, used for tea making in China; lovely pink bloom; glossy foliage; upright habit. (Not the tea plant, but a Chinese substitute.)
- MALUS PARKMANI (*Halliana Parkmani; Parkman C.*), double; pink. A dwarf tree; very low growing; just right for small gardens; very hardy; flowers an exceptionally lovely pink. Prolific; one of the first to open and one of the last to fade.

Prices of above 3 varieties

Size	Each	Size	Each	Size	Each
4 to 5 ft.	\$2.00	7 to 8 ft.	\$5.00	9 to 10 ft.	\$15.00
5 to 6 ft.	3.00	8 to 9 ft.	7.50	Heavy 9 to 10 ft.	20.00
6 to 7 ft.	4.00	Heavy 8 to 9 ft.	20.00	10 to 12 ft.	50.00

- MALUS SARGENTI (*Sargent C.*), dwarf; white; abundant showy fruit. A sort for the small garden and a great favorite on account of the bright fruit, and with the birds equally popular. Low growing and spreading habit, almost creeping. Just the sort for rockeries and small gardens. One of the most striking varieties. Positively true to name. Good for a hedge up to six feet high.

Size	Each	Size	Each	Size	Each
2 to 3 ft.	\$2.50	3 to 4 ft.	\$3.50	4 to 5 ft.	\$5.00

5 to 6 ft. 4.00 35.00 From 7 ft. up, can be had in Standard or Tree Form.

Magnolias

MAGNOLIAS

M. Alba Superba. A splendid white variety of vigorous growth. Occasionally the white petal is suffused with pink. A very delicate color scheme; preferred by many.

M. Lennei. The largest flowering of the Chinese Magnolias; large flowers of magnolia red, freely produced; large foliage. The habit of growth of this variety is spreading; the lower branches show a distinct tendency to trail on the ground. Under good conditions in fertile soil with abundant rainfall this sort will continue to bloom throughout the entire season. To a limited degree this can also be said of all the rest of the varieties. If a liberal amount of moisture and fertility is supplied to Magnolias, one can force them into bloom throughout the summer with no detriment at all to next spring's crop of flowers.

M. Soulangeana. Pink. Best known of all the Magnolias. Grows into a tree of medium size. All the sizes we offer are blooming size.

<i>Price of above 3 varieties</i>					
Size	Each	Ten	Size	Each	Ten
3 to 4 ft.	\$3.50	\$30.00	5 to 6 ft.	\$8.50	\$65.00

5 to 6 ft. — 6 to 8 " " " " very heavy	5.00	45.00

M. Stellata (Halleana), is the familiar early blooming dwarf Magnolia, star shaped, snow-white flowers, very fragrant; slow growth, and for that reason rather expensive. The stock of this variety is exceedingly limited in all American nurseries.

Height	Each	Height	Each
2 to 2½ ft.	\$5.00	3 to 3½ ft.	\$9.00
2½ to 3 ft.	6.00	3½ to 4 ft.	12.00

Magnolias (continued)

M. Nigra (Purpurea). Dark purple, the color now popular. One of the finest Magnolias in cultivation; moderate growth takes up less space than most varieties and is one of the best sorts; exceedingly prolific. The color of the flower is deeper and richer than all the rest. Our nurseries is probably the only place where this variety can be bought. It is destined to be the most popular of all the Magnolias and is particularly adapted to small gardens.

Height	Each	Height	Each
2 to 3 ft.	\$3.00	Heavy, 6 to 7 ft.	\$15.00
3 to 4 ft.	4.00	" 7 to 8 ft.	20.00

CRYPTOMERIA JAPONICA LOBBI, Japan Temple Tree. Tall and stately. Rich dark green foliage which becomes exceptionally attractive in the spring when the new growth is made. Very rare and much in demand. With few exceptions our trees are branched to the ground and are symmetrical, as they have been pruned annually and transplanted frequently. This method produces excellent compact trees.

Size	Each	Ten	Size	Each	Ten

6 to 6½ ft.	25.00	5 to 5½ ft.	20.00

TSUGA (*Hemlock*)

Canadensis (*Hemlock Spruce*). A handsome ornamental tree for lawn or forest plantings, or for hedges.

Size	Each	Ten	100
4 to 5 ft.	\$5.00	\$35.00	\$300.00
5 to 6 ft.	6.00	40.00	350.00
6 to 7 ft.	9.00	70.00	600.00
7 to 8 ft.	10.00	85.00	750.00
8 to 10 ft.	15.00	125.00	1200.00
10 to 12 ft.	25.00	200.00	1500.00
12 to 14 ft.	35.00	300.00	2500.00
14 to 16 ft.	50.00	400.00	3500.00

Users of Hemlock Spruce in large quantities may obtain reductions on the already low prices by stating how many they can use, as one lot of 700 trees 10 to 16 feet must be moved within 18 months, as the land has been sold.

Ground Cover Plants

PACHYSANDRA TERMINALIS, Japanese Spurge.

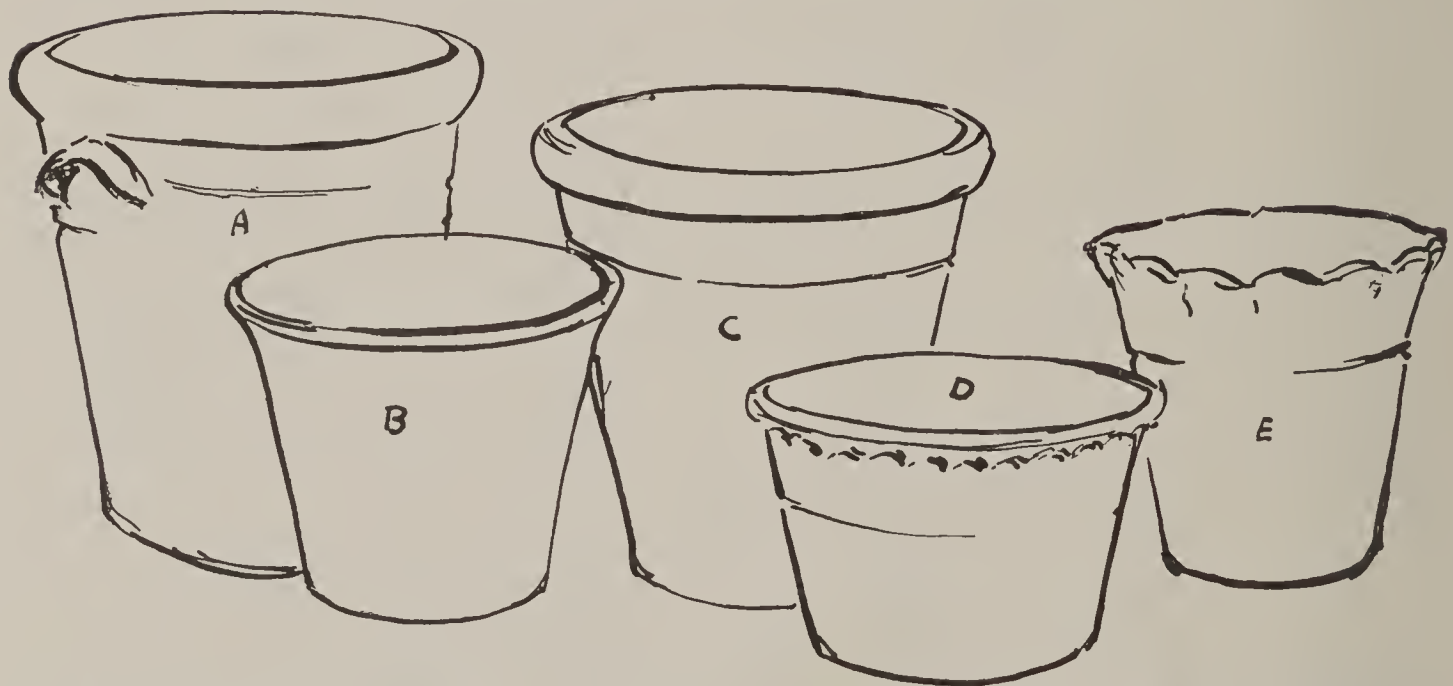

A beautiful evergreen plant excellent as a ground cover, growing from 6 to 8 inches high. It is perfectly hardy and endures dense shade and dry locations, as well as direct sunlight or moist positions, making an excellent plant for any position requiring other than grass for a ground cover. It is also suitable as a border for walks and flower beds, as its low green growth at all times may be easily kept within bounds. Plants 6 to 8 inches apart.

	100	1000
Potgrown plants, 2¼ inch pots	\$10.00	\$90.00
1 year Field-grown plants	7.00	45.00
Well-rooted plants	5.00	35.00

VINCA MINOR, Periwinkle or Trailing Myrtle. A trailing, evergreen plant, used extensively for carpeting the ground under shrubs or trees, or on graves. Blue flowers.

	100	1000
Potgrown plants, 2¼ inch pots	\$10.00	\$90.00
Well-rooted plants	5.00	35.00

A. E. WOHLERT
THE GARDEN NURSERIES
NARBERTH, PENNA.

The three heavier plants in hand-made pots are five years old. These plants were well established in the pots when photographed.

The lighter plant in the machine-made pot is a three year old potted fieldgrown Wistaria three months after potting.

NOTE: Our Wistaria are intended to be used as vines and to be planted in the garden. This also applies to our Standard or Tree form Wistaria. While they all may be used and grown in pots permanently, this method requires skill and effort, but is worth it.

We carry a fairly large supply of Wistaria in pots not only for convenience, but also because potgrown plants can be shipped with nearly 100% of the roots even when all the soil is removed to save cost of transportation.

Our published prices are based upon supplying field-grown plants with bare roots.

Sample plants of Standard Wistaria in bloom three months after they were placed in tubs. The flowers are under-size, but produced quite abundantly. Standard Wistaria may be used as vines, but are intended for use as garden accents. Their top growth can readily be controlled and they will bloom freely every spring.

**A. E. Wohlert, The Garden Nurseries
Narberth, Pennsylvania**

Espalier Trained Dwarf Fruit Trees

Distinctive Practical Decorative

Trained Fruit Trees should have a place in every garden and we are sure many gardeners will welcome our offer of these trees at this time. It is a simple matter to erect a "post and wire" fence to which they may be lightly tied or to a "wired wall," which is accomplished by driving wall hooks into the wall at intervals of 1 foot each way, leaving 4-5 inches protruding, to which the galvanized wires are horizontally attached. The "leaders" of the trees are carefully tied to the wires by "figure of eight" loops of tarred twine or heavy raffia, which allows limited leeway and prevents chafing.

Grown on the post and wire method, trained fruit trees are very ornamental in the garden—indeed they make a useful and artistic wind screen and background to flower beds and borders, the blossoms and, later, the highly colored fruit adding further brightness to the border.

They bear splendid crop of nicely colored, large fruit, without shading or otherwise interfering with the flowers or vegetable crops planted nearby; fruit is easily gathered and trees are readily manured and pruned.

They serve a dual purpose, being both ornamental and useful. In Spring their exquisite blossoms add a decorative touch to the early garden display, but our appreciation is greatest when they offer us their luscious fruits in the Fall.

There are good reasons why trained fruit trees should be seen frequently in small gardens as well as on large estates, to which they have been mostly restricted in the past. Probably the difficulty experienced in finding the proper material has been an influence in preventing the use of trained trees, but this difficulty no longer exists and the cost of trees, which have been started in either espalier or cordon form, is by no means prohibitive.

Trained trees enable the owners of small properties to utilize wall space which might otherwise be wasted. The side of a building or a board fence may thus be made to produce surprisingly large crops of choice apples, pears, peaches, cherries and even nectarines. Only three years are required ordinarily for these trees to reach the bearing age and, apart from their practical value, they lend a touch of the "old world" to the garden which is seen all too rarely in this country.

Trained trees should be planted 12 to 15 inches from a wall to allow for fruit development.

Beware of cheap espalier trees, for if they are offered at materially less than our prices, they cannot be dwarfs but are ordinary orchard trees trained, and they cannot be kept down to the confined space no matter what you do.

Dwarf fruit trees for ordinary garden planting away from walls are available at lower prices than trained trees.

Ask for prices of dwarf fruit trees.

Espalier Dwarf Trained Fruit Trees

The varieties of fruits listed below have been chosen for their adaptability to espalier work and the high quality of fruit. Under each Espalier form, we list the fruits available in that particular form.

- APPLES—Duchess of Oldenburg, Delicious, Fameuse, McIntosh, Baldwin, R. I. Greening.
 PEARS—Bartlett, Flemish Beauty, Clapp's Favorite, Duchess d'Angouleme, Beurre d'Anjou, Seckel.
 PLUMS—Reine Claude, Abundance.
 PEACHES—Late Crawford, Hale, Rochester, Ellberta, Hiley.
 NECTARINES—Napier, Boston, Red Roman, Newton.
 APRICOTS—Early Golden, Moore Head.
 CHERRIES—Morello, for shady places.
